EMERGENCY APP UNVEILED

The Public Safety and Emergency Preparedness Council announced that a new online Emergency Preparedness app is now available for your smart phone. The app includes emergency communication methods and important phone numbers, plus information on what to do in a variety of emergencies, from Active Threat to Robbery or Theft.

The app is available for students, staff, faculty or visitors to download for free. To download the app, open a browser on your smartphone and go to https://grossmont-280d5.web.app/. Using the prompts, select "Add to Home Screen."

MANAGER/SUPERVISOR PROFESSIONAL DEVELOPMENT PROGRAM BEGINS

The Human Resources Department has put together the 2019-20 schedule for the new Manager/Supervisor Professional Development program. The program has three components: workshops, peer learning, and coaching.

The workshops are made up of four six-week cohort tracks in the areas of Leading, Managing, Communicating and Diversity, Equity and Inclusion. A four-hour course on performance management is also being offered. Each cohort track will begin with a coaching session in which managers/supervisors will identify their own goals in relation to the track and their department.

During the workshops, managers/supervisors will have an opportunity to collaborate with other leaders regarding their current or anticipated challenges in relation to the deliverables identified from the coaching sessions and in line with the goals of the manager/supervisor.

The program is being coordinated by Professional Development Specialist **Anaid Northcraft**.

CAMPUS AND PARKING SERVICES TO LAUNCH NEW PARKING APP

This fall, Campus and Parking Services will be launching the new Passport Parking app that will allow students and others to pay for parking through their phone instead of getting a pass at a ticket machine.

The app is available from the Apple App Store or Google Pay store, and can be used anywhere the Passport Parking app signs and decals are displayed. Parking can be paid for by phone, and if necessary, the time also can be extended by paying through your phone. The app sends alerts when a parking session is about to expire, ending concerns about how much time is left. Receipts for parking are emailed to your phone at the end of your session.

Campus and Parking Services will be promoting the app to students during Welcome Week.

NEW PHONE SYSTEM GOES LIVE

The Mitel phone system for all District employees will be going live July 29. Members from Packet Fusion, the phone vendor, will be on each campus to help resolve issues and answer questions.

Once the Mitel phones go live, Information Technology is asking employees to disconnect their Tadran phone sets and set them aside so they can be picked up.

WELCOME TO OUR NEW EMPLOYEE

Gina Zambelli has been selected as an Account Clerk, Senior, in the Accounting Office. She worked since May 2018 as Administrative Assistant IV in the Business Services office. Gina is a graduate of San Diego State University.
