

GROSSMONT-CUYAMACA  
COMMUNITY COLLEGE DISTRICT

**Resolution 21-018**  
**Designating Certain Products, Brands, and Services**

On motion of Member Justeson, seconded by Member Schorr, the following resolution is adopted:

**WHEREAS**, Pursuant to Public Contract Code Section 3400(b), the Grossmont-Cuyamaca Community College District (“District”) may make a finding that designates certain products, things, or services by specific brand or trade name for the statutorily enumerated purposes, and

**WHEREAS**, the District’s Board of Trustees (“Board”) has reviewed the District’s current facilities, general contracts, plans, and specifications in order to evaluate the District’s need to establish uniform, complete and compatible maintenance service systems and technology systems Districtwide in order to facilitate the most reliable, dependable, cost efficient and feasible education for students in the District, and

**WHEREAS**, based on the Board’s above described review and Public Contract Code Section 3400(b), the Board has determined that the District must require and specify the use of certain products, things, or services on District projects as found below, and

**NOW THEREFORE BE IT RESOLVED BY THE BOARD OF TRUSTEES OF THE GROSSMONT-CUYAMACA COMMUNITY COLLEGE DISTRICT AS FOLLOWS:**

Section 1. The District, pursuant to Public Contract Code Section 3400(b), intends to establish uniform, complete and compatible control, management and monitoring systems, furniture, equipment, materials and products Districtwide in order to facilitate the most reliable, dependable, cost efficient development of District facilities and programmatic activity.

Section 2. The District has found compatibility, cost, and utility of other available systems to be problematic and believes it is necessary to establish complete District systems to avoid incompatibility issues, as well as durability and reliability issues, and costs associated with experimenting, replacing incompatible and useless system parts/components, and to avoid the waste of District funds associated with addressing incompatible components, equipment, materials, and products.

Section 3. The District and its consultants have undertaken considerable research into the products/brands utilized by the said systems, which would properly serve the District’s administrative and educational purposes.

Section 4. The District’s existing facilities already utilize specific products/brands relating to the said systems and furniture, equipment, materials and products. The District’s findings contained herein are made to match those existing systems, furniture, equipment, materials and products currently in the District, and to avoid the cost of designing and engineering systems

and components that may not be compatible, could never be made compatible or could only be made compatible after expending considerable District resources and funds.

Section 5. Pursuant to Public Contract Code Section 3400(b), the District's Governing Board desires to designate several proprietary systems and products for the District's use in order to match items in existing projects to establish one complete Districtwide system, avoiding incompatibility of products and systems.

Section 6. In addition to the need to establish a Districtwide system to ensure the compatibility of existing parts to new District parts, the District, pursuant to Public Contract Code Section 3400(b), also intends to establish uniform standards for the listed product and system for the following reasons:

- A. **Alignment System Equipment: Automotive Lift – HUNTER ENGINEER COMPANY** Alignment System Equipment is necessary for the District's automotive lifts because:
1. Hunter Engineer Company products are compatible with the current alignment systems. Products from other manufacturers are not interchangeable. Thus, any new manufacturer(s) would be an unnecessary duplication of tooling also adding significant extra cost.
  2. Cuyamaca College's Automotive Technology Department currently has two Hunter Engineer Company alignment racks (this is a replacement of one of the racks) including peripheral alignment equipment from Hunter Engineer Company and is intended to be a continuation of necessary program upgrades.
  3. The current alignment rack will be used in conjunction with this new alignment software and camera equipment and will likely not work with other alignment equipment manufacturer software and cameras.
  4. These products and parts are readily available from a variety of sources enabling District Purchasing to acquire necessary parts quickly and easily.
  5. These companies are well established in the industry and have been in business for many years, so new and replacement products are expected to be readily available in the future.
  6. Hunter Engineer Company's alignment equipment is the most common alignment and tire equipment found in the automotive dealers as well as big chain stores.

**PASSED AND ADOPTED** by the Governing Board of the Grossmont-Cuyamaca Community College District of San Diego County, California, this 12<sup>th</sup> day of October 2021 by the vote:

AYES: Adams, Cartwright, Justeson, Monroe, Schorr

NOES: None

ABSENT: None

I, Debbie Justeson, Clerk of the Governing Board, do hereby certify that the foregoing is a full, true and correct copy of a resolution duly passed and adopted by said Board at the regularly called and conducted meeting held on said date.
